## LITTLE HOPE.

News From Mr. Geo. C. Atkinson, Seriously III at San Antonio, Texas.

TROUBLE CAUSED BY MOUNTAIN CLIMBING

Relatives Go to him But Hope of Recovery is Nearly Abandoned.

Yesterday's telegrams brought news of the almost certain fatali-ty of the illness of Mr. Geo. C. Atkinson, who was stricken at San Antonio, Texas, while en route home from Mexico. A message received just after noon from Mr. Chas. R. Long, Jr., of Louisville, who was his compan-ion on the journey, saying that . Atkinson's condition was

The dispatches say the illness had its rise, according to the physicians' diagnosis, in the rupphysicians diagnosis, in the tup-ture of a blood vessel in the brain caused by mountain climb ing in high altitudes. Complica-tions followed this and his condition has grown gradually worse. The patient is in the hands of the best physicians and nurses in San Antonio and everything that

skill can do is being done.

Mr. George C. Atkinson has been a leading citizen of Earlington for about thirty years and one of the first officials in the St.

Bernard Coal Co., and then the dent John Bernard Coal Co., and teen the dent John Mitchell is to lead the St. Bernard Mining Co., during insurgent forces in the Colorado most of that time. ## MORE ENCOURAGING.

News From George C. Atkinson This Morning Gives Hope.

A telegram received this morning from Mr. Chas. R. Long, Jr., at San Antonio, Texas, says:

"Dr. Chatten and Mrs. Atkinson arrived safely, Meet doctors in consultation. Have not abandoned all hope. Letter from Chatten follows.'

This, in the light of all advices for the past two days and up to last night, which were steadily more serious in character, gives great relief and a measure of hope to Mr. Atkinson's family and friends here.

Individuality

There is an individuality about Kohn Brothers' Clothing—that "something" which marks and makes it just a little different, if not always just a little better than the ordinary "ready-made."

One point of excellence in their clothing and that which gives it individuality is the trimmings, finishings, etc. No cheap linings are used, it's either silk or all-the woods are green, and every piece of thread used is pure dye silk, thoroughly tested before using.

All garments made in their own shops under their own personal supervision.

It is this which makes "ready-made" clothing—the "ready-made" clothing—the "New Kind"—desirable.

## MINING NOTES.

NEW COAL FIELD

sylvania Company to Develop Coal Lands Around Slaughtersville.

It is stated on pretty good authority that the town of Slaugh-tersville will soon become a mining center.

Some time ago Eastern parties went to Slaughtersville and took options on most all the mineral privileges through that section, and a report says that a quiet game has been played in the matter and that in the past few days it has developed that a com-pany composed of Pennsylvania capitalists have rushed in upon the town, deposited money in the bank there, having machinery shipped in and are taking up the options and moving in a business like way, and coal mines will soon be opened up there.—

The Louisville Spar, Lead and Zinc company, organized early in January with a capital stock of \$25,000, has closed a contract with D. C. Roberts, of Marion, Crittenden county, to mine from its fields, located there 400 tons of fluorspar a month, which has been contracted for by Pittsburg and Pennsylvania companies to be used in fluxing fron ore. The ready sale which the product has found will cause the company to increase its capital stock and be-gin aggressive operations as soon as possible. The stockholders in Louisville are L. M. Rice, R. The tonnage of the coal output of the world is a matter of popular interest, and the question is often raised. Statistics for the year 1903 just made public shows the world's total output to have been 941,897,112 tons. The output of the United States, Great Britain and Germany the three leading coal producing countries of the world for 1903, was United States, 354,037,380 tons; Great Britain, 257,061,700 tons and Germany, 165,826,496 tons.—Manufacturers' Record.
